

CERTIFICATE

**The first person to reach the top of
Chimborazo and the bottom of the
Challenger Deep is Vanessa O'Brien
(UK/USA), who summited Chimborazo
on 6 June 2016 and descended to the
Challenger Deep on 12 June 2020.
O'Brien visited both extremes within
a time of 4 years 7 days.**

Who
MT CHIMBORAZO

What
6384400 METRE(S)

Where
UNITED KINGDOM ()

The mountain whose summit is farthest from the Earth's centre is the Andean peak of Chimborazo. It is 6,310 m (20,702 ft) high, and lies 158 km (98 miles) south of the equator in Ecuador. Its summit is 2,150 m (7,054 ft) further from the Earth's centre than the summit of Mt Everest, since the Earth's radius in Ecuador is longer than the radius at the latitude of Mt Everest.
